

See where the workday really goes.

Employee Productivity Tracking & Intelligence — attendance, active time, apps & websites, breaks, meetings, and a clear productivity score. On your cloud, or on your own servers.

by **AMETECs** · Industry-first Gate-to-PC · Your data, your walls · Own it forever

The workday has blind spots

1

Proxy & buddy punching

Someone clocks in for a colleague who isn't there — attendance you can't trust.

2

Idle time is invisible

Hours look "present" but you can't see active vs idle, or where the time actually went.

3

Your data leaves your walls

Most tools park screenshots and activity on someone else's cloud you don't control.

4

You rent software forever

Monthly fees that never stop — you pay and pay, and never own anything.

Meet SmartEPT — one system, three simple parts

1

Web Console

Where owners & managers work — live dashboard, attendance, reports, policies. Opens in a browser.

2

Desktop Agent

A small, visible app on each employee PC. Records only what your policy allows — after they consent.

3

Central (Ametecs)

Handles your licence & billing. It never sees your employee data — only what's needed to activate.

Always visible. Always consent-based. No hidden mode, ever.

Three reasons clients fall in love

01

Gate-to-PC

The PC only works after a door punch.
Buddy punching stops on day one.

02

Your data, your walls

Keep every screenshot & record on
your own server. We never see it.

03

Own it forever

Buy once at an honest price. No
endless rent — the software is yours.

Gate-to-PC — punch in, then the PC works

1

Punch at the door

The biometric punch reaches SmartEPT in real time.

2

PC unlocks for work

The agent verifies the punch and allows the session.

3

Step out? Auto-break

Punch out mid-day → PC locks, break timer starts.

4

Office-time vs desk-time

Managers see the gap between present and productive.

Stops from day one

- ✓ Buddy / proxy punching
- ✓ Attendance you can't trust
- ✓ Unauthorised workstation use

Fail-safe: if the door is down, an authorised person can approve login — every fallback is logged.

Your operational data stays yours

Choose On-premises and every screenshot, activity record, camera event and productivity figure stays inside your own server or private cloud. Ametecs keeps only the licence information needed to activate and support you.

On-premises

Your server

All data on YOUR infrastructure. Runs even if we're offline (offline signed licence). We never touch it.

Managed Cloud

We host it

We run the server, backups & updates. You just install the agent. Same product, same features.

Own it forever — not rent it forever

Rent (typical tools)

- ✗ Pay every month — forever
- ✗ Stop paying, lose access
- ✗ You never own anything
- ✗ Costs pile up year after year

Own with SmartEPT

- ✓ One-time price by user capacity
- ✓ Licence never expires
- ✓ First year of updates & support in
- ✓ Optional AMC only if you want it

From **₹25,000 one-time** · all features included

ONE COMPLETE PLATFORM

Everything a manager needs — included

Attendance & shifts

Active vs idle time

App & website usage

Screenshots (policy-driven)

Webcam presence

Live status & live screen

Meetings & scheduling

Productivity scoring

Breaks & time-outs

Restrictions & USB controls

Biometric gate-to-PC

Reports, exports & payroll pack

Every standard feature is on — you choose your user capacity and how you deploy, not a cut-down edition.

CLARITY, NOT GUESSWORK

A productivity score you can explain

0–100

Productivity score

per employee, per day

1

Productive working time

Active + meeting time counts up

2

Fair working window

Present time minus allotted break

3

Fully transparent

A one-click view shows how each score was built

4

Compliance score too

Separate 0–100 for policy adherence

BUILT ON TRUST

Fair to the business — and to the team

Visible, never stealth

The agent is always on-screen; employees see exactly what's running.

Consent-based

Tracking starts only after the employee agrees on their PC.

Camera = numbers only

Presence is a count and a brightness reading — no photo or video is sent.

Full audit trail

Every sensitive action and override is recorded and exportable.

Role-based access

Managers see only their team; employees see only themselves.

You control everything

Turn each policy on or off; nothing is captured unless you enable it.

SIMPLE, TRANSPARENT PRICING

Two ways to buy — your choice of scale

Cloud — rent per user / month

from ₹6-45 / user / month

- ✓ We host, maintain & back it up
- ✓ Pooled cloud storage included
- ✓ Cheaper per user as you grow
- ✓ Free for the first 7 days

Perpetual — own it once

from ₹25,000 one-time

- ✓ Priced by user capacity
- ✓ Licence never expires
- ✓ Host it on your own servers
- ✓ Optional AMC for updates

Every feature included in both • setup is separate • GST invoice on everything • prices admin-configurable.

Built in India, for Indian businesses

300+

businesses already trust Ametecs products

GST

ready invoicing, PF/ESI/statutory context

3

languages of support — English, Telugu, Hindi

SmartEPT joins SmartDCM (debt-collection CRM) and SmartPRS (HRM & payroll) — one family, one standard of quality, and it integrates with them when you need it.

Fall in love in one demo.

Start a free 7-day trial, or let us walk you through it live. Cloud or on your own servers — every feature on from day one.
